Conference Summary

**BIG DATA
NEW YORK**
4th June 2026

Big Data NYC 2026 will position Northern Ireland at the heart of the global conversation on artificial intelligence, data innovation, and transatlantic collaboration.

Taking place on **4th June 2026 at Business Insider Headquarters as part of New York Tech Week**, this flagship conference will connect technology leaders, investors, and policymakers from both sides of the Atlantic to explore how AI is transforming modern industry.

Under the theme **"AI on the Edge of Innovation,"** the event will focus on the real-world application of artificial intelligence and data-driven solutions across industries such as **Financial Services, Media, and Healthcare.**

The conference will feature keynote addresses from international thought leaders, sector-specific panels, and exclusive networking sessions designed to foster collaboration, attract investment, and showcase Northern Ireland's exceptional digital talent and innovation capability.

Building on the success of the wider Big Data series — spanning Belfast, Dublin, and New York — this year's edition will serve as a strategic platform to deepen partnerships between the **UK and US technology ecosystems**, advance R&D collaboration, and highlight Northern Ireland's role as a **trusted transatlantic technology hub.**

Event Highlights

**BIG DATA
NEW YORK**
4th June 2026

Global keynote speakers

showcasing next-wave technologies and AI applications

Sector-led panels

exploring practical case studies and transformative outcomes

Roundtables and forums

driving collaboration across research, investment, and policy

Cross-Atlantic innovation showcase

connecting Northern Irish scale-ups with US partners

Networking receptions

linking leaders from technology, government, and academia

By uniting private sector leaders, academic researchers, investors, and government representatives, Big Data NYC 2026 will drive forward the next phase of cross-border cooperation in AI and data – catalysing innovation, strengthening trade relationships, and amplifying Northern Ireland's position as a global centre for emerging technology.

Part of **NY TECH WEEK**

Conference Aims and Objectives

**BIG DATA
NEW YORK**
4th June 2026

Aims:

Strengthen Transatlantic Technology Collaboration

Uniting innovators, investors, and researchers from Northern Ireland and the US to drive shared progress in data, AI, and digital transformation.

Showcase Cutting-Edge AI and Data Technologies

Demonstrate how organisations are leveraging emerging technologies — from AI at the edge to real-time analytics — to solve complex global challenges.

Position Northern Ireland as a Transatlantic Tech Partner

Reinforce the region's role as a bridge between UK, US, and European markets — offering world-class capability, cost efficiency, and dual market access.

Accelerate Industry Adoption of Advanced AI

Support the application of machine learning, automation, and intelligent infrastructure across Financial Services, Media, and Healthcare.

Advance Responsible and Scalable Innovation

Foster cross-border discussion on ethical AI, governance frameworks, and sustainable data ecosystems that underpin long-term digital growth.

Objectives:

Create new partnership pipelines

between Northern Irish and US companies, research institutions, and investors.

Highlight applied AI success stories

from Northern Ireland's technology ecosystem.

Drive knowledge exchange

through panels, case studies, and collaborative forums.

Foster R&D collaboration

focusing on AI, data governance, and emerging technology infrastructure.

Deliver strong international visibility

for Northern Ireland's digital economy at New York Tech Week.

Conference Themes

**BIG DATA
NEW YORK**
4th June 2026

AI in Action: From Cloud to Edge

How data intelligence is moving closer to where value is created — accelerating decision-making, automation, and performance.

Financial Services at the Frontier

How predictive analytics, fraud detection, and generative AI are redefining risk, regulation, and resilience.

Media and the Future of Creativity

How AI is transforming content creation, audience engagement, and brand trust in the digital era.

Healthcare and Human Insight

Developments in clinical decision support, personalised medicine, and AI-assisted diagnostics.

Responsible AI and Regulation

Building frameworks that balance innovation, ethics, and international governance.

The Future Workforce

Developing AI talent pipelines through cross-border academic and industry collaboration.

Target Audience

C-suite executives
(CTOs, CIOs, CDOs)

AI and data science leaders

Fintech, HealthTech, and MediaTech innovators

Policymakers and trade representatives

Investors, venture partners,
and business accelerators

Academic researchers
and technology collaborators

Industries Represented

Financial Services

Media & Entertainment

Healthcare & Life Sciences

Public Sector & Policy

Technology & Cloud Computing

Advanced Manufacturing

Academia & Research

Key Partners

Presenting Partner: Analytics Engines

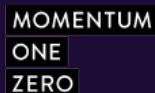

*Providing technical leadership
and showcasing applied AI and
analytics innovation across industries.*

Headline Sponsor: Invest NI

Supporting Sponsors:

Software NI, Momentum One Zero, AI Collaboration Centre (AICC) and Daily Pay

Together, these organisations champion the region's strengths in data innovation, responsible AI, and international collaboration.

Networking and Engagement Opportunities

**BIG DATA
NEW YORK**
4th June 2026

Tech & Investment Forum:

Connecting Northern Irish companies with US investors and partners.

AI Labs & Roundtables:

In-depth discussions on emerging technologies in finance, media, and healthcare.

Policy Forum:

Addressing the future of AI regulation and cross-border collaboration.

Innovation Showcase:

Live demos and research features from Northern Ireland's tech ecosystem.

VIP Reception at the

British Consulate:

Building high-level relationships across government, academia, and industry.

Why Attend?

Big Data NYC 2026 is not just a conference — it's a catalyst for technology exchange and international collaboration.

As part of **New York Tech Week**, the event provides direct access to influential voices in AI, finance, media, and healthcare, while positioning Northern Ireland at the forefront of the global conversation on **AI-driven innovation and transatlantic partnership**.
